

Brand Guidelines

LAST REVISED: 8/2026

Purpose

This is a guideline to Scouting Colorado's brand and identity. Follow these guidelines so people everywhere will recognize Scouting Colorado every time they visit our website, read a flyer, or attend a Scouting Colorado event. By following these guidelines, Scouting Colorado will be distinguishable as both a part of the National Scouting America organization, but also as its own council. Understanding the Scouting Colorado vision, mission, values, and culture helps us understand how to communicate our organization's goals. Keep the following in mind when crafting messaging. This creates a strong brand personality.

Color Palette

The color palette sets a visual tone for the Scouting Colorado brand. Colors can also create a strong brand recall when it is associated with your brand.

Color palette guidelines

- The primary color palette is to be used on all marketing materials for Scouting Colorado
- The primary color palette is inspired by the iconic Scout Uniform. It includes an American Flag red and blue, paired with a uniform beige and warm button grey.
- The secondary color palette may be used to complement the primary palette but never to substitute.
- Consistent use is important.
- Use the HEX # to easily look up these colors when creating a document. Use the CMYK # (measured in percentages) when color printing.
 - A Hex #, or color-hex, is a six-digit combination of numbers and letters defined by its mix of red, green, and blue. In order to find & use a specific color within a document such as Word, highlight the section you want to color, select a “Color” > “More Colors,” and input the Hex # of the color you desire. Make sure to include “#” before your digit combination.

Fonts

Arial is always a great go-to when conveying information that may be lengthy. The key is to go for fonts that are legible and applicable. Below are other wonderful options that we use often.

TT Family

Examples:

TT Bells

TT Barrels

TT Nooks

TT Slabs

Roboto Family

Examples:

Roboto Slab

Helvetica Family

Examples:

When using bold fonts like:

Berthold Block

for headings or flyers or to create fun (we are a youth organization - flyers should be fun!), think outside the box. Be sure it is legible.

If you are not sure about your choice, ask.

Use of AI

AI can be a great tool, but if it's not controlled, it can dilute brand quality quickly, especially when lots of different people are creating content.

Scouting Colorado recognizes that Artificial Intelligence (AI) tools can be helpful in brainstorming, drafting, and design. AI may be used as a support tool, but all final content representing Scouting Colorado must meet our brand standards for quality, accuracy, and authenticity.

AI-generated content must always be reviewed, edited, and approved by a human before it is published or distributed.

Content that appears obviously AI-generated, inaccurate, generic, or inconsistent with Scouting Colorado's voice and visual standards should not be used.

Writing

Requirements

All AI-assisted writing must:

- Be edited by a human before publication
- Match the voice, tone, and style of Scouting Colorado
- Be fact-checked for accuracy
- Be tailored to the specific event, audience, or program

Not Acceptable

Content should not be published if it:

- Sounds generic, robotic, or overly formal
- Includes inaccurate or fabricated information
- Uses vague or repetitive language
- Clearly appears to be unedited AI output
- If AI-generated text requires significant editing, it should be rewritten rather than lightly modified.

Image Generation

Requirements

All AI-assisted visuals must:

- Follow the Scouting Colorado brand standards
- Use official logos and colors correctly
- Be reviewed for accuracy, realism, and quality
- Be edited or rebuilt in design software if necessary

Not Acceptable

The following should not be used in Scouting Colorado materials:

- AI images with obvious visual errors (distorted hands, faces, uniforms, badges, etc.)
- AI-generated Scouts, uniforms, or insignia that are inaccurate
- Flyers or graphics that look clearly AI-generated or unpolished
- Designs that misuse official logos or brand colors

Real photos of Scouts, volunteers, and events should always be prioritized over AI-generated imagery.

Event Flyer Checklist

Use this Checklist when creating any event flyer to ensure all important information is included.
